

NARC Kenya wishes to voice their concern over recent events that negatively impact on the quality of lives of Kenyans.

During the on-going Rainy Season, Kenyans have witnessed life threatening but avoidable **floods in Nairobi and other places**. Cases of **Cholera, diarrheas** have been reported in various places. The cause of these diseases is **low level of cleanliness, clogged drainages** as well as **personal hygiene**. We must stop **littering** and keep drainage clean all the time to ensure that our **Roads and Streets** do not turn to rivers when it rains.

We suggest that the authorities take a leave from **Rwanda** who have set aside a **day a week** to clean up their environment while providing **litter bins** beyond the **Central Business District (CBD)**.

Over the last two years Kenyans have been exposed to so much **Insecurity** that their lifestyles have changed. What is worrying though is that the situation seems to be getting worse than before. With **ninety five (95) schools** in the **Northern Part** of the country **closed** in the account o **Insecurity** and an **International Presidential Flight canceled Mid-Air** is worrying to Kenyans.

It is a fact that the **Country's insecurity** is closely related to **corruption**. With hundreds of **Road Blocks** across the Country, **terrorist's booms** can only **penetrate** through **corruption**. This brings into question the level of **patriotism** on the parts of some of our **compatriot** who man this entry and transit points.

NARC Kenya is also concerned by their **attendant risks** resulting from the **confused devolution** of the **Health Sector** to the Counties. The **devolution in the Health Sector** surely could have been handled better.

We call upon the Government to take firm steps to ensure that Kenyans get the Quality of Services they deserve and entitled to.

We Wish All Kenyans Well, in Their Endeavors

LONG LIVE KENYA, LONG LIVE NARC-KENYA
